

MA(1): θ and $1/\theta$ give the same autocorrelation

— $\rho(1) = \theta / (1 + \theta^2)$

- - - ± 0.5 : the largest possible $|\rho(1)|$

invertible: $|\theta| < 1$

● $\theta = 0.5$: $\rho(1) = 0.4$

● $\theta = 2.0$: $\rho(1) = 0.4$
