

K_t converges to $\bar{K}$ (start $P_1 = 1$)

—●— $q = 0.04$: $\bar{K} = 0.181$

—●— $q = 0.25$: $\bar{K} = 0.390$

—●— $q = 1$: $\bar{K} = 0.618$

— $\bar{K} = \alpha_{SES}$

Noisy data (small q): small weight on y_t
